NO
BAY
BRIDGE
TO KENT

Thank you -
There is no need to build a Bay Bridge to Kent Co.

Thank you
Another note to say PLEASE no bridge to Kent County. It would ruin this beautiful area. We are "centrally isolated," low population, no traffic, and we love it this way. Have you been here? Without a bridge, you may not want to retire here. It is charming and beautiful.

Dear M's lane,

I am writing to oppose Bay Crossing to Kent County. Obviously, the whole infrastructure will have to be built up. Destroying Kent County may be on your agenda but I sincerely hope not.

I have lived here since 1972. Ideas have come and gone for by passes, new bridges et al. I hope this idea is quickly disposed of.

Sincerely,
Ms. Heather Lowe

Re: Proposed New Bay Bridge Crossing Location

Dear Ms. Lowe:

This is an appeal to eliminate Kent County as the potential location for a new bridge between the Western Shore and Eastern Shore of Maryland. As I am certain you realize, the people who live in Kent County are overwhelmingly opposed to anything that would impact our county so drastically.

If you ask people who live in or have relocated to Kent County why they choose to live here, one of the first things they mention is to be away from traffic. Interestingly, the absence of major highways is cited as a significant plus. So is a slower and more relaxed way of life. No wonder a bridge crossing through here is truly unwelcome.

This is a place where residents and visitors alike come to enjoy historic sites, rural beauty, and of course our rivers and the Chesapeake Bay. Please - no bridge to Kent County!

Sincerely yours,
