People that need to commute every day across the bay bridge for their work and leisure should use this mass transit and then on the other side have quality electric buses to get these people to their destinations. Which would include mass transit going from Annapolis via route 50 in the middle of the highway to DC. Where there's a will there's a way to make our environment better with mass transit a part of our future.</p> <p>Sincerely, [Name Redacted] Sent from my iPad</p>
