

Bay Crossing Study

- The Bay Crossing Study is a critical step in addressing existing and future traffic congestion at the William Preston Lane Jr. Memorial (Bay) Bridge.
- The study involves development of a Tier 1 Environmental Impact Statement (EIS) in accordance with NEPA.
- The study encompasses a broad geographic area, spanning nearly 100 miles of the Chesapeake Bay from the northern-most portion in Harford and Cecil counties to the southern border with Virginia between St. Mary's and Somerset counties.
