11/25/2025	Website	<p>Would strongly urge that one of the southern options be used. The northern options would almost surely have severe impacts on Sandy Point State Park and some adverse impact on Terrapin Nature Park. Sandy Point provides the only public beach and water access on the Chesapeake in this area. People come from all over AA county, Washington DC and even Virginia to these parks.</p> <p>Yes the southern route may impact a private marina and other facilities but there are other private marinas.</p>
